

CENTRIC INSIGHT FOR AEC

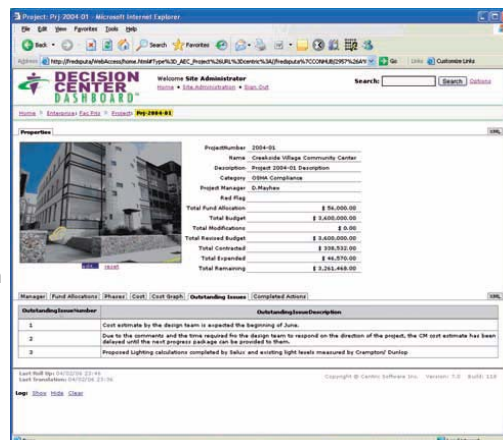

Centric Insight for AEC solution leverages existing technology investments and processes to radically improve performance, visibility into all project metrics, and accountability.

In a very demanding, competitive environment; today's architectural, engineering, and construction firms must meet Owner's growing demands of faster, lower cost projects and still strive to maximize profitability. These demands drive new initiatives to improve efficiency in the execution, monitoring and communication of planning, design and construction projects. Most AEC software is training-intensive, takes too long to deploy, forces the organization to change its processes; and at the end of the day, still won't communicate with other existing technology investments.

Centric Insight for AEC can be realized by deploying an intuitive solution that leverages existing systems, without changing established processes, to enhance collaboration and information availability throughout the execution of a project.

Centric Insight for AEC solution provides AEC Firms with Project Intelligence, and uniquely overcomes interoperability challenges by leveraging existing technology to radically improve the collection of project-related information, the facilitation of decision-making, the execution of project milestones and the analysis and assessment of performance metrics.

Each phase of project development is faced with challenges to collect project information, which may be scattered across multiple workstations, network folders and proprietary systems. Centric Insight for AEC enables Project Intelligence by providing access to project information regardless of source or location. Allowing the project team to make vital decisions, optimize project execution, and continually assess project status to close the project on time and on budget while maximizing profitability.

SHARE INFORMATION INSTANTLY
WITH A DISTRIBUTED TEAM

RESULTS

- ▶ Overcome interoperability by leveraging existing email, document, CAD, accounting and ERP systems for capital program-related data.
- ▶ Improve process efficiency without modifying existing business practices.
- ▶ Enhance project decision-making and results with access to comprehensive, up-to-date project information for improved issues resolution.
- ▶ Speed operations by providing instant access to drawings, schedules, construction documentation and as-built information.
- ▶ Maintain complete logs of project activities, events and decisions.
- ▶ Maintain tight control over the scope of work with immediate visibility by automated notification of issues.

GIVING THE [CENTRIC] PLATFORM A GOOGLE-LIKE FUNCTION WILL HELP CUSTOMERS MINE DATA MUCH MORE EFFECTIVELY.

CENTRIC INSIGHT FOR AEC EMPOWERS WITH PROJECT INTELLIGENCE

Centric Insight for AEC Insight solution provides AEC Firms with Project Intelligence, and uniquely overcomes interoperability challenges by leveraging existing technology to radically improve the collection of project-related information, the facilitation of decision-making, the execution of project milestones and the analysis and assessment of performance metrics.

Each phase of project development is faced with challenges to collect project information, which may be scattered across multiple workstations, network folders and proprietary systems. Centric Insight for AEC enables Project Intelligence by providing access to project information regardless of source or location. Allowing the project team to make vital decisions, optimize project execution, and continually assess project status to close the project on time and on budget while maximizing profitability.

Centric Insight for AEC Insight solution provides AEC Firms with Project Intelligence, and uniquely overcomes interoperability challenges by leveraging existing technology to radically improve the collection of project-related information, the facilitation of decision-making, the execution of project milestones and the analysis and assessment of performance metrics.

Each phase of project development is faced with challenges to collect project information, which may be scattered across multiple workstations, network folders and proprietary systems. Centric Insight for AEC enables Project Intelligence by providing access to project information regardless of source or location. Allowing the project team to make vital decisions, optimize project execution, and continually assess project status to close the project on time and on budget while maximizing profitability.

▶ OVERCOME SYSTEM INTEROPERABILITY FOR MORE ACCURATE DECISIONS

Centric Insight for AEC's project dashboard overcomes interoperability challenges presenting project-related information and crucial metrics gathered from previously incompatible systems. Project

Managers gain a comprehensive understanding of program schedules, budgets, issues and activities. Powerful visual analysis tools quickly reveal exceptions and trends, ensuring program insight that enhances decision-making and financial results.

▶ EXECUTE PROJECTS MORE EFFICIENTLY, MAXIMIZE PROFITABILITY

Centric Insight for AEC Insight solution dramatically improves project execution while requiring no changes to established procedures. With automated process management and record keeping, Centric's AEC Insight solution reduces administrative overhead, increases adherence to standards and improves project control. Track and manage Work Orders, RFI's, Submittals, issue lists and other routine tasks, and use dynamic workflow capabilities to orchestrate multi-phase capital projects.

Acclaim

"We are all handling more projects with limited resources, and this collaborative solution plays a major role in our ability to deliver projects on time and on budget."
